

the **ARCHIBULL** PRIZE

THE ARCHIBULL PRIZE 2017 OUTSTANDING STUDENT **KIT RODRIGUEZA - FINALIST**

Kit Rodriguez, from Matraville Sports High School, has been involved with The Archibull Prize for four years. He began the program as a shy Year 9 student with an interest in art and will be leaving next year as a Year 12 student who is looking to study graphic design at University.

Kit worked with Matraville's entries from 2014 to 2016, designing logos and infographics, mentoring younger students and aiding with design and drawing. In 2016 he was targeted as a senior leader for the school's Gifted and Talented Program and he was an exceptional role model, leading the school to its second crowning of Grand Champion Archibull.

Matraville Sports High School did not enter the 2017 Archibull competition, however, of his own choice, Kit has helped the Little Bay Community of Schools "Pigs Can Fly" entry, providing the students with hands on support and learning opportunities.

Sarah Robinson from Matraville Sports High School made these comments in regard to Kit: "The skills and opportunities offered through the Archibull competition have been the making of this student. I can honestly say there is no student more deserving of this prize as he has actively and selflessly worked to promote the ethos of the program - promoting access to safe, affordable, healthy food and quality fibre every day, and a brighter future for all."
